

Alexander Wilson

Full Stack Software Engineer && Front-End Web Developer

alexwilson0017@gmail.com

(704) 322-9178

Charlotte, NC 29730

WHAT I'M MADE OF

- JavaScript (Front & Back)
- MySQL & Sequelize
- Web APIs & Server-Side APIs
- Object Relational Mapping
- Regex (Regular Expressions)
- Local Storage
- MongoDB
- 3rd Party Frameworks incl. jQuery & Bootstrap
- CSS & HTML
- React
- Angular
- Node.js
- Wordpress
- Express.js
- Jest

ABOUT ME

There's beauty and awesomeness in everything around us, online and reality. I'm always thinking of ways to make things cooler in both realms. Outside of work, my time is spent with my son and wife, working on my sports cars, traveling the world playing the Pokémon TCG competitively, and coding for fun!

RECENT WORK EXPERIENCE

Bank of America, Charlotte NC - Software Engineer

MAY 2022 - PRESENT

Summary

I'm part of a daily deploy team, constantly updating Bank of America websites. We deploy code every single day to fulfill the line of business' requests. In doing so, I touch both front-end and back-end code, creating new web features, quickly accommodating legal updates, and I myself am in charge of all of the bank's security-center pages.

Spectrum / Charter, Charlotte - Software Engineer

DEC 2021 - MAY 2022

Summary

I worked on the software that Spectrum technicians used on the job. Worked on their mapping software to get from customer's home to businesses, the messaging app, customer account management and more. I had to learn Angular on the job, and learned so much from this opportunity before moving to Bank of America!

EDUCATION

UNCC 2021 Full Stack Web Development Certificate

Stanly Community College 2016 Associate of Arts

- Full Stack Web Developer (UNCC)
- x2 TCG Regional Champion (ask me)
- XC County Champion
- Father

PROJECTS

PTCG Legends

Site: <https://ptcglegends.com/>

What started out as a simple school project two years ago, has become what is now the LARGEST Pokemon TCG site of all time! Articles, documented hundreds of tournament results that date back to 25+ yrs ago and thousands of decks used by the most successful players in history! As of 2023, more than 10,000 people visit the site monthly, thus I've had to rework many aspects of the site to accommodate the traffic.

(My biggest regret with this site, is not having made it with React. Thus, that's a plan for the future.)

Languages & Technology Used:

- JavaScript
- CSS
- HTML + json
- API usage
